

Memo from

To: Howard

JOSHUA LEDERBERG

AUG 6 1971

Stanley Symposium

I vividly ~~remember~~ <sup>recall the</sup> exciting news reports of the first crystallization of TMV -- when I was about 11 -- and I would very much like to do honor to the memory of the man who was audacious enough to do such a thing!

Unfortunately, Mariner arrives at Mars on Nov. 14 and I am optimistic enough to think that it may be important that I stay down at JPL, or on a short tether, just around that time. So I think I had better not get us into a difficult box by accepting that date.

Try Paul Berg -- he has some very exciting things cooking.

Yours,

PROFESSOR JOSHUA LEDERBERG
